

Digital Booking Platform

In order to increase the booking efficiency and improve the client service capabilities IDIADA China Proving Ground is using our self-developed proving ground management system to manage all the bookings received.

Proving ground management system allows clients to make bookings online, check the status of their bookings and consult any useful information related to PG operations in a dynamic way.

- [Proving Ground Management System \(PGM\)](#): We'll provide our clients credentials to access to the platform.
